Title: Chiropractic's vulnerability strengthened with transparency, inclusion, and collaboration

Speaker: Katherine A Pohlman, DC, MS, PhD
Chiropractic LICENSE #:13897 (Texas)

Description:

A vulnerability is a weakness that allows harm to a stakeholder. Within the chiropractic profession our weakness has been the lack of research literacy and quality/quantity of research. With much braver, our profession is focused on this gap and filling it with research activities that are focused on transparency, inclusion, and collaboration. In this presentation, Dr. Katie Pohlman, Vice Chair of the Chiropractic Future's Research Workgroup and Director of Research at Parker University, will describe current research activities that are optimizing chiropractic patient outcomes and strengthening our evidence gap.

Objectives:

- Describe the key gaps in chiropractic literature.
- Outline the quantitative and qualitative data gathered to create an actionable and measurable action plan to strengthen the current lack of chiropractic evidence.
- Highlight how transparency, inclusion, and collaboration have been the center for the creation of key research activities.
- Discuss current research activities that clinicians can support that will help optimize patient outcomes.

Outlines:

0-10 minutes: Gaps in the literature

10-20 minutes: Data Review

20-30 minutes: Transparency, Inclusion, Collaboration

30-45 minutes: Current research initiatives

45-60 minutes: Recent/Current research projects
