

Pediatric and Pregnancy

Hr. 1 and Hr.2 Examination and Treatment of the Infant

Instructors: Nancy Elwartowski-Cooper, DC; Cristina Padilla, DC; Beth Lancaster, DC;
Sonia McGowin, DC

Course Description: This lecture will provide detailed clinical information to assess and treat infants in the office. The doctor will learn how to take a thorough prenatal history with a focus on the infant development and red flags. In addition, the doctor will be introduced to the infant examination including primitive reflexes, range of motion, musculoskeletal considerations. Finally, the lecture will cover doctor-parent communication skills that can put the parent at ease when discussing treatment options.

Hour 1: Clinic information and prenatal history

Hour 2: Infant examination and treatment options review with parents
