Course Syllabus

Basic MRI Part 1

COURSE OBJECTIVE

To describe the basic physics behind the production of an MRI image.

STATEMENT OF PURPOSE

The purpose of this course is to aid the Chiropractic Profession by providing Chiropractors with the information regarding the basic principles involved in producing MRI images.

OVERVIEW OF COURSE

Although a detailed understanding of nuclear physics is not necessary to interpret MRI studies, chiropractors should have a solid understanding of the basic principles involved in producing MRI images. This course describes the basic fundamental principles shared by all MRI scanners.

COURSE OUTLINE

HOUR 1

Diagnostic Imaging Interpretation
The history of MRI
A comparison of MRI, X-Ray, and CT Scan
The advantages and disadvantages of MRI
The physics of MRI
The MRI magnet
Different types of MRI scanners
Slides and narration of above material

PROGRAM FORMAT

www.dchours.com

All of courses are presented in the following format:

- Each course is in the format of a narrated slide presentation. Each slide in the course has accompanying narration and presentation moves through the slides automatically.
- The doctor viewing the presentation may not move forward to the next slide until the narration of the current slide is completed. The doctor may go back and view previous slides at any time, however in order to receive a certificate of completion the doctor must view all of the slides and listen to all of the narration for each slide. This insures that all the slides in the presentation are viewed and the required amount of time is guaranteed.
- The course will automatically log all the hours that the doctor spends viewing the course.
- In addition to the quizzes, the doctor must also pass a final exam. Only after the doctor completes viewing and listening to each slide and the final exam is complete, will the certificate of completion be issued.
- Information for each course is gathered from books, peer reviewed articles, and experience. All courses include references and courses are updated each year.
- Attendance is monitored by the software program. It logs and tracks all the time spent viewing the course.
- The licensee is allowed 6 months to complete a course.
- DC Hours.com maintains records of licensee completing a course of study for 7 years
