## **Course Syllabus**

### **Basic MRI Part 3**

#### **COURSE OBJECTIVE**

To describe the basic principles involved in interpreting MRI images.

#### **STATEMENT OF PURPOSE**

The purpose of this course is to aid the Chiropractic Profession by providing Chiropractors with the information regarding the basic principles involved in interpreting MRI images.

#### **OVERVIEW OF COURSE**

In the third part of this series we will discuss the Contraindications to MRI, how to read an MRI report, and the MRI appearance of DDD, Ligamentum Flavum Hypertrophy, Disc Herniations, Annular Tears and Post-disc Surgical cases.

#### **COURSE OUTLINE**

##### **HOUR 1**

Diagnostic Imaging Interpretation

Contraindications for MRI

Reading the MRI report

The MRI appearance of:

- Degenerative Disc Disease

- Annular Tears

- Disc Herniations

- Ligamentum Flavum Hypertrophy

- Post-disc Surgery

A Case Review of MRI Confirmed Spontaneous Regression of Lumbar Disc Herniations

Slides and narration of above material

## PROGRAM FORMAT

[www.dchours.com](http://www.dchours.com)

All of courses are presented in the following format:

- Each course is in the format of a narrated slide presentation. Each slide in the course has accompanying narration and presentation moves through the slides automatically.
- The doctor viewing the presentation may not move forward to the next slide until the narration of the current slide is completed. The doctor may go back and view previous slides at any time, however in order to receive a certificate of completion the doctor must view all of the slides and listen to all of the narration for each slide. This insures that all the slides in the presentation are viewed and the required amount of time is guaranteed.
- The course will automatically log all the hours that the doctor spends viewing the course.
- In addition to the quizzes, the doctor must also pass a final exam. Only after the doctor completes viewing and listening to each slide and the final exam is complete, will the certificate of completion be issued.
- Information for each course is gathered from books, peer reviewed articles, and experience. All courses include references and courses are updated each year.
- Attendance is monitored by the software program. It logs and tracks all the time spent viewing the course.
- The licensee is allowed 6 months to complete a course.
- DC Hours.com maintains records of licensee completing a course of study for 7 years
