Course Syllabus

Communicable Diseases: OSHA Standards

COURSE OBJECTIVE To review the OSHA Standards that have been developed for the handling of blood borne pathogens in the healthcare environment

STATEMENT OF PURPOSE The purpose of this course is to aid the Chiropractic Profession by providing Chiropractors with information regarding the standards for preventing the transmission of blood borne pathogens in the healthcare environment

OVERVIEW OF COURSE This course will provide a detailed review of the OSHA standards and Guidelines detailing the proper procedures for handling blood borne pathogens and the prevention of transmission. As a result of this course doctors will be able to implement the policies and procedures set forth by OSHA regarding blood borne pathogens.

COURSE OUTLINE

HOUR 1 A Review of OSHA Standards for Blood Borne Pathogens

During this hour we will cover:

- The difference between a standard and a guideline
- General Duty Clause Violations
- Who is covered by the standard?
- What is an exposure control plan?
- Work Practice Control
- Engineering Control
- Hepatitis B Vaccine
- What to do if there is an exposure
- Recordkeeping
- What is a reportable incident?
- Amendments to the standard

PROGRAM FORMAT

www.dchours.com

All of courses are presented in the following format:

- Each course is in the format of a narrated slide presentation. Each slide in the course has accompanying narration and presentation moves through the slides automatically.
- The doctor viewing the presentation may not move forward to the next slide until the narration of the current slide is completed. The doctor may go back and view previous slides at any time, however in order to receive a certificate of completion the doctor must view all of the slides and listen to all of the narration for each slide. This insures that all the slides in the presentation are viewed and the required amount of time is guaranteed.
- The course will automatically log all the hours that the doctor spends viewing the course.
- In addition to the quizzes, the doctor must also pass a final exam. Only after the doctor completes viewing and listening to each slide and the final exam is complete, will the certificate of completion be issued.
- Information for each course is gathered from books, peer reviewed articles, and experience. All courses include references and courses are updated each year.
- Attendance is monitored by the software program. It logs and tracks all the time spent viewing the course.
- The licensee is allowed 6 months to complete a course.
- DC Hours.com maintains records of licensee completing a course of study for 7 years
