

Course Syllabus

Risk Management in Chiropractic: 3 hour

Description:

This is a three-hour self-paced distance based course designed to assist health care providers in identifying and managing the medical legal risks associated with staff interactions with patients. Areas of potential risk from employee interactions are explored with additional information on reducing or eliminating these risks.

Goals:

- Identify and develop a plan of action regarding the prevention of risk management issues associated with staff patient interactions
- Understand how supervisors will be held responsible for the actions of their staff members
- Identify what professional rules are as they relate to practice obligations
- Analyze the key cultural factors that can influence patient care
- Provide a staff hand out on professionalism in the work place
- Identify staff responsibilities regarding sexual harassment
- Identify common sources of sexual harassment
- Understand how to resolve behaviors associated with professional boundary violations
- Discuss the definition, principles, goals, and objectives of physiotherapy (passive care) procedures
- Define "adjunctive care" as it applies to the health care arena.
- Remember potential legal issues associated with physiotherapy
- Analyze indications of when to withhold physiotherapy or to discontinue a physiotherapy procedure
- Identify the seven principles of rehabilitation.
- Identify key areas of risk management in regards to active care.
- Outline the basic components of a therapeutic exercise program and their interrelationship to patient outcomes
- Identify the roles of support staff in relation to improving risk management.
- Explore the concept of staff training as a method to reduce medical legal risks.

Requirements:

Three hours of study (time logged online) and the successful completion of an online examination.

Your time logged is displayed on the upper right of your Home page/tab.

Evaluation:

This on-line program is scored as a Pass/Fail class. If you do not pass the class on your first attempt you will be directed to specific reading by the instructor and provided the opportunity to successfully complete the class. This class requires you to log in the time and obtain 75% of the possible points to receive credit for the class.

Course Schedule:

Hour	Topic
ONE	Patient interactions and professional boundary issues
TWO	Patient interaction and professional boundary issues, including physical contact between staff and patients during care.
THREE	Patient contact during patient care including the application of modalities and active care

Online Conduct

We believe that the following is probably not very necessary to address. Nevertheless, for the sake of clarity, please realize that the State Boards and DConline™ cannot and will not be responsible for the content of any personal messages, which are sent from one student directly to another student using the online email delivery system. It is expected that all students will adhere to accepted codes of professional, personal, and civil conduct when conversing online, using email, or engaging in any real time online chat sessions. Failure to abide by such codes of conduct and etiquette will result in withdrawal from the course and a failing grade.

Personal Involvement and Time

Students often have the misconception that taking a course online is easier since they don't have to physically go to a classroom. When taking an online course there are some things that become easier for students. For example it becomes easier NOT to go to class. It also becomes easier to get behind. While this medium gives learners more flexibility in attending class, **remember that taking a course online is just more convenient, not easier!** Set time aside and get the job done, then go for a run, or play a round of golf, or spend some time with your family instead of driving, flying or just sitting!

Technical help can be found at the "help" button at the bottom left of your page. Here you are able to submit a support ticket for whatever issue you may be experiencing. You may also email dconline@dconline.org or call 712-260-2507 (M-F 9a-5p MT).
