

Emergent Care of the Injured Individual

Tuition: \$199

Hours: 12

Instructor

[Robert Nelson, DC, DACBSP, FIACA, CSCS](#)

Course Description

This 12-hour distance-based course will provide Doctors of Chiropractic with the information relating to implementing care for the traumatized chiropractic patient. There will be in depth studies of the techniques used with commonly encountered emergency situations encountered in the clinical and other settings. The course uses multimedia and a multitude of teaching techniques. This course does contain evaluative measures in the form of a final examination-using fill in the blank, essay and multiple-choice questions to evaluate learner outcomes. The exam requires a passing score of 75% or the student is instructed to do more study and retake the exam.
