

## SYLLABUS

**Title:** Practical Methods & Analysis of the Vertebral Subluxation

**Dates&  
Locations:**

**Instructor:** Dr. Stuart Humberg

**CE Hours Requested:** 12

### **I. COURSE OBJECTIVES**

This program will enhance the doctor's knowledge of the vertebral subluxation and complications to health due to dysfunction. The doctor will learn how to analyze the subluxations he is seeing in his office to come to the best treatment for the individual patient.

### **II. COURSE OUTLINE**

|                   |   |
|-------------------|---|
| 8:00 pm – 9:00 am | Overview & Review of Anatomy<br>1. Overview<br>2. CNS & PNS Systems   |
| 9:00 – 10:00 am   | Anatomy of the Vagus Nerve<br>1. Situation<br>2. Outreach to other areas of the body<br>3. Affects                  |
| 10:00 – 11:00 am  | Overview of Vertebral Subluxation in relation to Neural Systems<br>Proper function<br>Indications of chronic issues |
| 11:00 – 12:00 pm  | Treating the Whole Body<br>How Systems Link and the Chiropractic Approach to treating them                          |
| 12:00 - 1:00pm    | An in-depth look at VSC & Neurological Function<br>A. Signs to look for<br>B. Proper Evaluation<br>C. Treatments    |
| 1:00 - 2:00 pm    | A. Signs of stress<br>B. What to look for before treating   |
| 2:00 – 3:00pm     | Systems & Function related with dysfunction of physical and biological systems.                                     |

- A. Specific issues
- B. Common Concerns
- C. Protocols

- 3:00 – 4:00 pm    Methods to assessing the Vertebral Subluxation  
                          Assessment tools  
                          Evaluations  
                          Why and what to look for
- 4:00 – 5:00pm    Methods to assessing the Vertebral Subluxation (continued)  
                          Palpation  
                          Static & Motion  
                          Muscle Testing  
                          Reflex Testing
- 5:00 - 6:00 pm    Problem areas that relate to the Vertebral Subluxation  
                          1. Identifying the problem  
                          2. Chiropractic Assessment
- 6:00 – 7:00 pm    Pain & Symptom Management  
                          1. Symptoms Presented  
                          2. Evaluation & Assessment
- 7:00 - 8:00 pm    Chiropractic Treatments  
                          1. Causes, Evaluation & Diagnosis  
                          2. Proper Treatment Protocols  
                          3. Rehabilitation
