**Frequently asked question:**

**Do I need an instrument to practice KST?**

**Answer:** KST can be practiced without an instrument and no instruments are needed to perform a complete patient analysis. For correction however, Dr. Koren recommends an instrument because it makes practicing KST easier, faster and more comfortable for both the practitioner and the patient. He prefers and recommends the ArthroStim or AccuStim instrument produced by IMPAC Inc., as he finds it superior in quality and cost to anything else on the market. Instruments will be available for use as well as purchase, at the KST price, at the seminar.

At the seminar you will receive the best care of your life and will learn to give the same.
