

100-Hour 5-Weekend Chiropractic-Acupuncture Course

Hybrid Format

Live-Webinar Instruction & Live-Classroom Clinical Training

This program is designed to be presented as a hybrid program comprised of Three 20-hour Synchronous Distance Learning Webinars and Two 20-hour Hands-On Live Seminars.

Weekends 1, 3, & 4 are presented as webinars, and weekends 2 & 5 as live-classroom learning.

Doctors who complete this program are well prepared to safely provide acupuncture and related techniques to effectively address most musculoskeletal and neurological complaints, as well as many internal disorders commonly seen in chiropractic practice. This is a comprehensive, sequenced, and succinct program, wherein clinical theories and techniques are followed by musculoskeletal disorders and metabolic disorders ranging from digestive to women's health concerns. Learning methods include lecture, slide presentation, video demonstration and supervised hands-on instruction & technique practice.

Clinical training includes clean & safe needle handling & techniques, point location, and application of Traditional Chinese Medicine (TCM) diagnostic frameworks. This program also includes contemporary neurological and physiological perspectives on acupuncture's mechanisms of action, contemporary treatment styles, the release of trigger points and myofascial stress patterns, and best practices for integration into a chiropractic practice, as well as practical instruction in moxibustion, cupping, gua-sha, cold laser and electro-acupuncture.

100-hour Hybrid Program Curriculum Organization

Curriculum Is Organized Into Five 2-Day Weekend Seminars
(3 Webinars & 2 Live Classroom)

Classes Begin Each Day at 8:00am and Finish Up at 6:00pm

Each Weekend Provides 20 Hours of Instruction (50min = 1 CEU Hour)

Five 20-Hour Weekends (50min = 1 CEU hour)

Saturday: 8:00am- 12:30pm & 2:00pm 6:00pm

Sunday: 8:00am- 12:30pm & 2:00pm 6:00pm

Weekend # 1 Acupuncture: Traditional Approaches (WEBINAR)

Introduction: Acupuncture, Dry Needling, Legal, Practical, Clinic Setup,

Clinical Fundamentals: Yin & Yang, 8 Principles, Substances, Organs, 5 Elements

Meridian & Points: Introduction to Points and Meridians, 12 Primary Points

Clinical Techniques: Introduction to Acupuncture & Dry Needling

Acupuncture Microsystems: Pulse & Tongue Diagnostic Microsystems

Weekend # 2 Acupuncture: Yang Meridians & Treating Pain (Live-Classroom)

Clinical Fundamentals: Meridian Pathways and Myofascial Relationships

Points & Meridians: Du, Yang & Sinew Meridians

Clinical Techniques: Clean Needle Technique, Traditional Pain Management

Acupuncture Microsystems: Overview, Auriculotherapy

Weekend # 3 Acupuncture: Yin Meridians & Internal Disorders (WEBINAR)

Clinical Fundamentals: Organs & Respiratory, Digestive, GU, Relationships

Points & Meridians: Ren & Yin Meridians, Point Categories & Combinations

Clinical Techniques: Moxibustion/Heat Therapy

Weekend # 4 Acupuncture: Women's Health & Extra Meridians (WEBINAR)

Clinical Fundamentals: Women's Health & National Board Preparation

Points & Meridians: 8 Extraordinary Meridians

Clinical Techniques: Internal Medicine Point & Herbal Formulations

Acupuncture Microsystems: 8 Extraordinary Meridians

Weekend # 5 Acupuncture: Contemporary Approaches (Live-Classroom)

Clinical Fundamentals: Program Review

Points & Meridians: Ordinary Points for Extraordinary Results

Clinical Techniques: Trigger Points and the Ventresca Method

Acupuncture Microsystems: IASTM, YNSA, Neuroacupuncture, Hand, Treatment of Chemical Dependency

Curriculum & Learning Objectives

The curriculum is organized into 4 broad categories

1. **Clinical Fundamentals:** Traditional Chinese Medicine (TCM) and contemporary Western bio-medical theories of acupuncture, with a focus on those theories that have a strong clinical application
2. **Points & Meridians:** Acupuncture Points and Meridians, Trigger Points, & Motor Points focusing on those points that are particularly effective in practice
3. **Clinical Techniques:** Traditional acupuncture needling techniques, contemporary “dry-needle” style treatment, traditional & contemporary invasive and non-invasive acupuncture-related techniques
4. **Acupuncture Microsystems:** Select points and techniques from Auriculotherapy, Hand acupuncture, Chinese and Japanese Scalp acupuncture, the Ventresca Method, and other distinct acupuncture systems

Information within each category is sequenced within each of the five weekends, to encourage and enable efficient and effective learning.

Clinical Fundamentals: Participants learn the theories that form the basis of Acupuncture and Oriental Medicine: Yin/Yang, 5 Elements, 8 Principles, Qi, Jing, Shen, Zang Fu (Organs), and Pathogenic Influences, as well as an introduction to diagnostic techniques such as reading the tongue and the radial pulse. Throughout the program, participants frequently review the relevant information needed to effectively employ acupuncture in practice. Physiology, pathology and treatment specific to digestive, respiratory, genitourinary, and women’s health concerns are all addressed. This information, together with select information on points and techniques forms the bulk of the information needed to pass a national board exam in acupuncture. A comprehensive review of this material is included in the final weekend of the program, prior to the final exam which also serves as additional preparation for a national exam.

Learning Objectives: The main points participants are expected to learn and take away from this portion of the curriculum are:

1. A clear understanding of the fundamental Traditional Chinese Medicine (TCM) theories that support and underlie acupuncture
2. The clinical applications of Yin and Yang, 5 Elements, The Substances, and Pathogens
3. The main clinical theories relating to Chinese Organ (Zang/Fu) Physiology and common Pathologies
4. The ability to formulate diagnoses and treatment plans, based on TCM
5. Understanding of the contemporary theories, which bridge the gap between Oriental and Western medical paradigms

Clinical Techniques: In this portion of the program doctors learn to apply both invasive and noninvasive acupuncture treatment techniques, including clean needle technique, management of used needles, traditional acupuncture needling, dry-needle style needling, laser-acupuncture, cupping, gua-sha, moxibustion and electro-acupuncture. Participants also learn to treat many of the painful conditions commonly encountered in a chiropractic practice. Painful musculoskeletal, and neurological syndromes of the head, upper, mid and low back, thorax, neck, shoulders, arms, wrists, and hands, hips, legs, ankles, and feet, are all addressed. Participants learn how to select acupuncture points, techniques, and microsystems for the best results.

Learning Objectives: The main points participants are expected to learn and take away from this portion of the curriculum are:

1. A clear understanding of practice and importance of clean needle handling, storage, & disposal
2. An understanding of the reasons for needle selection
3. An understanding of how and when to choose between various treatment techniques
4. An understanding of the use of cupping, gua-sha, moxa, and other acupuncture-related techniques
5. An understanding of the clinically applicable theories and the use of milliamp electro-acupuncture
6. An understanding of the clinically applicable theories and the use of laser-acupuncture
7. Ability to formulate specific individual treatments, as well as applying effective empirical treatment protocols, for many common presentations and diagnoses.
8. A confident approach for selecting the appropriate treatment techniques
9. A positive approach for selecting specific needling techniques for the treatment of pain
10. Treating pain with the Ventresca Method for the release of myofascial stress patterns

Points & Meridians: Participants learn all of the the main meridians of acupuncture and each of the points on those meridians, including locations, actions & indications, needle depth & direction, and treatment techniques for each of the major points. In addition to the main points and meridians, the major extraordinary points, secondary and extraordinary meridians, and point combinations for treating disorders ranging from pain to internal dysfunctions are covered in some detail. Significant classroom time is spent locating and needling individual acupuncture points.

Learning Objectives: The main points participants are expected to learn and take away from this portion of the curriculum are:

1. A an understanding of all the acupuncture points and meridians, with a strong concentration on the most effective and commonly used points
2. Confidence in needling points found in various locations, including points on the head, neck, back, abdomen, and extremities
3. An ability to work with the Main, Sinew, and Extraordinary Meridians for the treatment of pain and many common internal disorders
4. A clinically useful overview of acupuncture point categories and their uses: Shu, Mu, Yuan, Luo, Xi, Element, Tonification, Sedation and Horary.
5. A clinically useful understanding of about 40 of the most commonly used acupuncture points, most trigger points, and select motor points, the reasons for choosing them, as well as specific techniques for locating, and treating these points.

Acupuncture Microsystems: Acupuncture microsystems are mainly comprised of constellations of points apart from the basic meridian system, which are generally found in specific or limited areas of the body. Auriculotherapy is the most commonly known acupuncture microsystem focusing on points found on the external ears. In addition to auriculotherapy, participants learn special points on the hands, and scalp, which are highly effective in clinical practice. In the course of this study, participants learn many theoretical foundations, actions, and indications, as well as specific techniques & protocols for the treatment of pain, post-stroke, smoking, weight-loss, and addiction.

Learning Objectives: The main points participants are expected to learn and take away from this portion of the curriculum are:

1. Comfort in utilizing selected points and techniques drawn from Auriculotherapy, Chinese Scalp Acupuncture, Japanese Scalp Acupuncture, & Hand Acupuncture
2. An understanding when to use Auriculotherapy, and techniques for applying the therapy with maximum benefit
3. An understanding how and when to use selected points drawn from “YNSA” Scalp Acupuncture, for the treatment of painful conditions
4. An understanding when to use Chinese Scalp Acupuncture, and techniques for applying the therapy with maximum benefit and minimal discomfort to the patient
5. An understanding of how and when to use selected points drawn from Chinese Hand Acupuncture
6. How and when to use zonal diagnosis and treatments to treat pain via the release of trigger points & myofascial stress patterns with the Ventresca Method
7. Formulation and use of specific individual treatment plans, as well as effective empirical treatment protocols, integrating various microsystems with standard acupuncture points

Instructor: Dr. Jim Ventresca [CV appended]

100-Hour 5-Weekend Hybrid Chiropractic Acupuncture Program Course

Hourly Breakdown

Weekend # 1 Acupuncture: Traditional Approaches Saturday & Sunday: 8:00Am- 12:30Pm & 2:00Pm 6:00Pm Introduction: Acupuncture, Dry Needling, Legal, Practical, Clinic Setup, Clinical Fundamentals: Yin & Yang, 8 Principles, Substances Meridian & Points: Introduction To Points And Meridians, 12 Primary Points Clinical Techniques / Microsystems: Introduction To Needles & Tools, Clean Needle Technique, Microsystems Overview, Auricular Therapy	
Sat. 8am-9am	Acupuncture Paradigm: Non-Reductionist Medicine; Major Texts And Historical Figures; The 1949 Introduction Of Tcm; 5 Branches Of Chinese Medicine; Current Popular Styles Of Acupuncture, Compare & Contrast Acupuncture & Dry Needling
Sat. 9am-10am	12 Primary Point Introduction: LI4, ST36, SI3, BL62, LU7, KD6, TB5, GB41, GB26, LR3, PC6, SP4
Sat. 10am-11pm	Yin & Yang: General Theory, Clinical Uses, Clinical Associations, Functions In The Body, Associated Disorders, Relationships In The Body,
Sat.11am-12:30pm	8 Principles: 4 Pairs Of Opposites, Internal, External, Hot, Cold, Excess, Deficient; Location & Etiology;
Sat. 12:30pm-2pm	Break
Sat. 2pm-3pm	Qi & Blood: Origin, Production, Functions, Directions, Imbalances, Related Organs.
Sat. 3pm-4pm	Jing, Shen, & Jin Ye: Origin, Production, Functions, Imbalances, Related Organs, And Fluid Metabolism
Sat. 4pm-5pm	Meridian Theory: Compare And Contrast Primary, Divergent, Sinew, Minute, Skin, Luo, And Extraordinary Meridians
Sat. 5pm-6pm	Pathogenic Factors: External Wind, Cold, Heat, Damp Internal Wind, Cold, Heat, Damp, Emotions, And Misc. Causes Of Disease
Sun. 8am-9am	5 Element Functional Theory: Introduction Of 5 Elements; Sheng & Ko Cycles And Pathology; Treatment Mother/Son,
Sun. 9am-10am	5 Element Specifics: Body Type; Table Of Correspondences
Sun. 10am-11pm	Introduction To Actions & Indications Of Meridians And Points
Sun11am-12:30pm	Horary Cycle: Chronotherapy Diagnosis And Treatment
Sun.12:30pm-2pm	Break

Sun. 2pm-3pm	Overview Of Acupuncture Points & Meridian Pathways: Define Points And Meridians, Point Palpation & Identification, Body Measurements, Yin Vs Yang Meridians,
Sun. 3pm-4pm	Tongue Diagnosis: Introduction To The Diagnostic Significance Of Color, Shape, Moisture, Coat, & Common Combinations Of Same
Sun. 4pm-5pm	Introduction To Pulse Diagnosis: Introduction To The Diagnostic Significance Of Size, Strength, Position, Level, Speed, & Qualities Of Wiry And Slippery
Sun. 5pm-6pm	Tongue & Pulse Diagnostic Practical

Weekend # 2 Acupuncture: Yang Meridians & Treating Pain Saturday & Sunday: 8:00Am- 12:30Pm & 2:00Pm 6:00Pm Clinical Fundamentals: Tongue Diagnosis, 5 Elements, Horary Cycle, Pathogens Points & Meridians: Du, Yang & Sinew Meridians Clinical Techniques / Microsystems: Point Release And Stimulation, Tcm Pain Management	
Sat. 8am-9am	Introduction And Review Of Material From Weekend #1
Sat. 9am-10am	Introduction / Clean Needle Technique / Introduction To Acupuncture Needles & Tools; Hand-Washing, Patient Contact, Clean Vs Sterile, Needle Isolation, Biohazard Storage And Disposal, Risks & Benefits
Sat. 10am-11pm	Needle Selection: Needle Sizes, Needle Types - Standard, Bleeding, & Semi- Permanent.
Sat. 11pm-12:30pm	12 Primary Point Practical: LI4, ST36, SI3, BL62, LU7, KD6, TB5, GB41, GB26, LR3, PC6, SP4
Sat. 12:30pm-2pm	Break
Sat. 2pm-3pm	Microsystems Overview: General Approach To Microsystems, Specifics Of Mi- crosystem Treatment, Microsystem Expectations, Compare And Contrast Ear, Scalp (Ynsa & Chinese), And Hand Acupuncture.
Sat. 3pm-4pm	Auricular Acupuncture Overview: Anatomy, Somatotypes, Landmarks, Point Catagories: Musculoskeletal, Organs, And Special Function
Sat. 4pm-5pm	Treatment Of Auricular Acupuncture Points: Point Prescriptions And Protocols I.E. Nada, Pain, Battlefield, Stop Smoking Support, Etc.
Sat. 5pm-6pm	Du / Governing Vessel Main & Sinew Meridians & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sun. 8am-9am	Large Intestine Meridian & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications;

Sun. 9am-10am	Stomach Meridian & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sun. 10am-11pm	Small Intestine Meridian & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sun. 11am-12:30pm	Urinary Bladdermeridian & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sun. 12:30pm-2pm	Break
Sun. 2pm-3pm	San Jiao Meridian & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sun. 3pm-4pm	Gall Bladder Meridian & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sun. 4pm-5pm	TCM Pain Management Theory
Sun. 5pm-6pm	TCM Pain Management Points And Practice

Weekend # 3 <u>Acupuncture: Yin Meridians & Internal Disorders</u> Saturday & Sunday: 8:00Am- 12:30Pm & 2:00Pm 6:00Pm Clinical Fundamentals: Organs, Respiratory, Digestive, Gu Points & Meridians: Ren & Yin Meridians, Point Categories & Combinations Clinical Techniques / Microsystems: Moxibustion / Heat Therapy	
Sat. 8am-9am	Point Categories: Jing Well, Ying Spring, Shu Stream, Jing River, He Sea, Yuan Source, Xi Accumulation, Luo Connecting, Back Shu, Front Mu,
Sat. 9am-10am	Organ Introduction Review
Sat. 10am-11pm	Ren Mai / Conception Vessel Main & Sinew Meridians & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sat. 11pm-12:30pm	Lung & Large Intestine Properties, Functions, Common Disharmonies, Major Signs & Symptoms Lung Meridian & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sat. 12:30pm-2pm	Break

Sat. 2pm-3pm	Spleen & Stomach Properties, Functions, Common Disharmonies, Major Signs & Symptoms Spleen Meridian & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sat. 3pm-4pm	Kidney & Bladder Properties, Functions, Common Disharmonies, Major Signs & Symptoms Kidney Meridian & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sat. 4pm-5pm	Heart, Small Intestine, Pericardium, San Jiao Properties, Functions, Common Disharmonies, Major Signs & Symptoms Heart & Pericardium Meridian & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sat. 5pm-6pm	Liver & Gall Bladder Properties, Functions, Common Disharmonies, Major Signs & Symptoms Liver Meridian & Major Points: Description Of Pathway, Clinical Uses Of Meridian And Individual Points. Practical - Location Needling Techniques, Actions And Indications
Sun. 8am-9am	Extraordinary Organs Properties, Functions, Common Disharmonies, Major Signs & Symptoms
Sun. 9am-10am	Extraordinary Organs: Gall Bladder, Brain, Marrow, Bone, Blood Vessels, Uterus
Sun. 10am-11pm	Introduction To The 8 Extraordinary Meridians
Sun. 11am-12:30pm	Moxibustion / Far Infrared Heat
Sun. 12:30pm-2pm	Break
Sun. 2pm-3pm	Digestive Patterns: Pattern Recognition, Treatment Methods And Techniques
Sun. 3pm-4pm	Respiratory Patterns: Pattern Recognition, Treatment Methods And Techniques
Sun. 4pm-5pm	Genitourinary Patterns: Pattern Recognition, Treatment Methods And Techniques
Sun. 5pm-6pm	Diagnostic Practical

Weekend # 4 Acupuncture: Women's Health & Extraordinary Meridians

Saturday & Sunday: 8:00Am- 12:30Pm & 2:00Pm 6:00Pm

Clinical Fundamentals: Women's Health**Points & Meridians:** 8 Extraordinary Meridians**Clinical Techniques / Microsystems:** Electro-Acupuncture, Laser-Acupuncture

Sat. 8am-9am	Theoretical Principles Comprehensive Review
Sat. 9am-10am	Extraordinary Meridians Introduction: Points And Pathways And General Treatment
Sat. 10am-11pm	Ren Mai / Du Mai: Examination Of The Actions Indications And Treatment Implementation
Sat. 11pm-12:30pm	Dai Mai / Chong Mai: Examination Of The Actions Indications And Treatment Implementation
Sat. 12:30pm-2pm	Break
Sat. 2pm-3pm	Secondary Vessels: Examination Of The Actions Indications And Treatment Implementation
Sat. 3pm-4pm	Extraordinary Meridians Physical, Psychological, & Systemic Implications
Sat. 4pm-5pm	Eight Extraordinary Meridians Chars.
Sat. 5pm-6pm	Women's Health Concerns Review: Relevant Organs, Substances And Theories: Liver, Spleen, Blood, Yin, Jing,
Sun. 8am-9am	Women's Health Physiology: Discussion Of How The Substances, Organs, And Meridians, Discussed Throughout The Seminar Relate Directly, And In Some Cases Uniquely, To Women's Physiology
Sun. 9am-10am	Women's Health Etiology & Pathology: Intricacies Of Tcm Pathology Specifically Related To Women's Reproduction And Breast Health, Focusing On Blood & Yin.
Sun. 10am-11pm	Women's Health Treatment: Point Prescriptions And Treatment Protocols Specific To Women's Reproduction And Breast Health.
Sun. 11am-12:30pm	Extraordinary Meridians & Women's Health
Sun. 12:30pm-2pm	Break
Sun. 2pm-3pm	Recommended Resources Review: Review Of Available Acupuncture Charts, Ear Charts, Scalp Charts, Online Classes, Websites, And Major Acupuncture Texts Addressing Their Value & Relevance To Participants Clinical Review / Board Prep - Organs, Meridians And Points: Discussion Of Clinically Applicable Physiology, Pathology, Diagnostics, And Major Associated Points
Sun. 3pm-4pm	Clinical Review / Board Prep - Jing & Shen & Jin Ye: Review And Clinical Relevance Of The Production, Functions And Imbalances Jing & Shen And Water Metabolism

Sun. 4pm-5pm	Clinical Review / Board Prep - Pathogenic Factors: Review And Clinical Relevance Of Internal External And Miscellaneous Causes Of Disease.
Sun. 5pm-6pm	Clinical Review / Board Prep - Ariculotherapy

Weekend # 5 Acupuncture: Contemporary Approaches	
Saturday & Sunday: 8:00Am- 12:30Pm & 2:00Pm 6:00Pm	
Clinical Fundamentals: Program Review & National Board Preparation	
Points & Meridians: Ordinary Points For Extraordinary Results	
Clinical Techniques / Microsystems: Treatment Of Pain, Ventresca Method , Chemical Dependency	
Sat. 8am-9am	Extra Points
Sat. 9am-10am	Ynsa Points And Location Techniques: Overview Of Ynsa Somatotype, Location Of Ynsa Points A, B, C, D, & E, Palpation And Needling
Sat. 10am-11pm	Chinese Hand Acupuncture: Somatotype And Musculoskeletal Points.
Sat. 11pm-12:30pm	Neuroacupuncture (Aka Chinese Scalp) Indications And Techniques: Overview Of Brain Map, Points Vs Lines, Landmarks, Names And Locations Of Treatment Lines
Sat. 12:30pm-2pm	Break
Sat. 2pm-3pm	Laser & Electro Acupuncture: Tools And Techniques
Sat. 3pm-4pm	IASTM Cupping & Gua Sha
Sat. 4pm-5pm	Review Pain Management With Classical Chinese Techniques: Introduction To Diagnosis And Prognosis Of Musculoskeletal And Neuromuscular Pain. Treatment Using Traditional Physical Medicine Techniques Including Palpation, Acupuncture, Cupping, Guasha, & Moxa
Sat. 5pm-6pm	Understanding How Various Meridians Treat Pain: Review Of Major Yang Meridian Pathways, Extraordinary Meridian Influences, Liver Meridians Association With Treatment Of Pain.
Sun. 8am-9am	General Point Selection For Treating Pain: Using Distal Points, Choosing Between And Combining Local And Adjacent Acupuncture Points, And Trigger Points
Sun. 9am-10am	Treatment Of The Major Points For Treating Pain: Review Of Major Points From Lr, Yangming, Shaoyang, And Taiyang Meridians

Sun. 9am-10am	Formulating Meridian Based Treatment Of Pain: Combining Meridian Pal-pation & Theory, Acupuncture, And Trigger Points, Utilizing Local, Distal And Adjacent Theory, And Choosing Appropriate Modalities And Techniques To Address The Points And Disorders.
Sun. 10am-11pm	Treatment Of The Sinew Meridians: Pathways, Advantages And Application Of Yangming, Shaoyang, And Taiyang Sinew Meridians For Treatment Of Pain, And Use Of Jing Points In Dredging.
Sun. 11am-12:30pm	Introduction To Ventresca Method Diagnosis & Treatment Planning: Over-view Of Anterior, Posterior, Lateral And Medial Zones
Sun. 12:30pm-2pm	Break
Sun. 2pm-3pm	The Ventresca Method For The Treatment For Pain: Patterns And Points That Address Anterior, Posterior, Lateral And Medial Zones, And Myofascial Stress
Sun. 3pm-4pm	Acupuncture For The Treatment Of Chemical Dependency
Sun. 4pm-5pm	Intro To Chinese Herbal Patent Medicines
Sun. 5pm-6pm	Diagnostic Practicum
