

Educators: Richard Amy, D.C. and Amy Cutter, LMT

Laser & Thoracic Outlet and Carpal Tunnel Syndromes

Laser experts, Dr. Richard Amy and Amy Cutter, LMT, partner together again to bring comprehensive information and practical techniques on the application of PBM Therapy to treat Thoracic Outlet and Carpal Tunnel Syndromes. They will share the perspective of both the Chiropractor and Massage Therapist to review the etiology of these syndromes and demonstrate how to use laser diagnostically as well as treat therapeutically. Attendees can advance successfully using laser therapy to treat these conditions using a simple step by step approach.

Learning Objectives:

PBM Therapy for Thoracic Outlet and Carpal Tunnel Syndromes is an overview to: educate attendees on the etiology of these conditions; dispel the myths; construct a strong foundation on which attendees will build a working knowledge of; and demonstrate to equip attendees with practical applications to treat these conditions using a simple, proven, non-invasive step-by-step approach for their patients' wellness.

Presentation Outline in 15-minute segments:

15 Minute intro to the anatomy of Thoracic Outlet Syndrome

- Most common causes of Thoracic Outlet Syndrome
- Brachial Plexus anatomy and issues
- Biological clinical effects of PBM

15 Minute of PBM Research

- Connection to Sacro-Iliac and shoulder girdle
- Demonstration of SI Joint release with PBM

15 Minute PBM case studies

- Median Nerve compression
- Examine/eliminate all nerve entrapment issues
- Clinical evaluation of compression neuropathy

15 Minute PBM and Carpal Tunnel

- PBM and Carpal Tunnel and IR treatment protocol
- PBM and Carpal Tunnel and Red treatment protocol
