Stress and the Relationship To Medical Errors

Course Description

Stress is ubiquitous and follows us everywhere. It is a psychological and physical response by your body to anything that is perceived as a threat or a challenge. Stress can be caused by either a negative challenge or a positive challenge. Since there is simply no avoiding it, the task for health professionals has become to further our understanding to improve management in our office, patients and in ourselves. In this 2-hour session, attendees will learn ways to lower stress within your practice, treat patients experiencing stress, and how to treat the many health issues due to stress.

Learning Objectives

- Define exactly what stress is
- Recognize common stress symptoms & ways to manage them
- Tips to lower stress levels and treat health issues caused by stress

8am-9:40am

Clinical CE

Speaker: Brett Winchester, DC

A Multi-Modal Approach to the Baseball Athlete

Course Description

A 2-hour discussion on how to integrate a variety of approaches into one treatment model. Current research continues to tell us that a multi-modal approach is the gold standard for musculoskeletal treatment. More specifically, we can have a greater impact on pains syndromes and the results are more likely to be sustained when a combination of modalities is used. The four pillars to be discussed will be Adjusting, Stabilization, Directional Preference (MDT), Historically, chiropractors suffer on when to use these different techniques in the most efficient way and how to use them together in a given treatment session. Current evidence in these modalities will be presented. Most importantly, the ability of the chiropractor to classify their patients is paramount and guides this process. Participants will also learn key factors to look at when observing players video and how to use this information to help with treatment and prevention of injury.

Learning Objectives

- Review current evidence on using a multi-modal approach for treatment
- Understand the importance of being able to dynamically palpate and correlate to manipulation
- Know current research on directional preference and what it means
- Review Stabilization through a DNS lens
- Recognize cases that require Neurodynamic assessment and treatment
- Discuss classification into these categories and when to combine

Mental Health Tsunami Integrative Health Call To Action: Our Ethical Duty

Course Description

Have you noticed the increased relationship between mental stress, opioids, and addiction in your practice? We have invited White House Surrogate and national expert, Dr. Rosa, along with the panelist and your local community to bring understanding to the buzz phrase that everyone is using: mental health tsunami. There is an overwhelming need to understand addiction and mental health, it is our mission to provide clinical and community expertise, so you stay abreast of the tsunami that is forming in your local community. Between this plenary session and the next clinical session, our goal is to arm you with both the awareness and resources to share how Chiropractic is more of a solution than people realize. Risks come in all forms, and protecting yourself and your patients is key, as we all encounter the tsunami that is forming around mental health in the next few years

Friday - 11/17/2023

10:20am-Noon

Clinical CE

Speaker: Steven Capobianco, DC

Upper Extremity Treatment Stack

Course Description

The training amalgamates manual therapy and vibration science to create simple and effective non-opioid, neuro musculoskeletal (NMSK) treatment and selfcare programs for the manual and movement professional as well as the athlete. NMSK injuries are one of the leading causes of disability in the United States.

Discover why using vibration-based therapies are effective interventions for pain management, improving pain, range of motion, and movement dynamics. A holistic (whole person) approach to movement and functional rehabilitation will be presented to aid in identifying key areas of compromise within the NMSK system. This training is an evidence-informed rehabilitation program that redefines our understanding of the effects of vibration in conjunction with traditional manual therapies (myofascial cupping, local/targeted massage) on pain mitigation, injury recovery/prevention and movement.

Learning Objectives

- Discuss the role of a systematic approach to pain management, mobility, motor control and stability with the goal of movement enhancement
- Discuss and experience the neuro-psycho-physiological effects of different frequencies of vibration
- Demonstrate functional use of vibration tools (compressive and decompressive) and functional taping to understand their role and use for the applications of rehabilitation, edema management, injury recovery, posture and dynamic movement management
- Demonstrate and discuss the new understanding of manipulating the 'neuromyofascial' system
- Demonstrate and discuss the use of vibration massager and vibrating cups with a psycho-social approach to care
- Discuss and implement a 'somatic reappraisal process' to identify and address neuro-psychosocial symptoms associated with the NMSK dysfunction

Mental Health Tsunami: Understanding and Unveiling to Your Community

Course Description

Now that we have established how this issue is effecting our local patients, this lecture has been created to deliver the details: anatomical/chemical happenings -> behavior correlation -> corrective action. Chiropractors CAN deliver better care and higher outcomes to their community. This clinical lecture is to take a deep dive describing how to deliver this message to your patients and your community.

Friday - 11/17/2023**1pm-2:40pm****Clinical CE***Speaker: Christopher Oswald, DC, CNS***What Really Happens with Chronic Stress****Course Description**

Chronic stress is a widespread problem that everyone has to deal with on some level. Whether it is fatigue, GI issues, or an inability to lose weight, they may all be related to an underlying adrenal health problem. Dr. Oswald will discuss the vast scope of this problem and why our ability to deal with stress has been challenged in today's society. Chronic stress can have a large negative impact on our physiologic function and Dr. Oswald will discuss how to recognize the problem, assess your patients, and provide treatment that will have a profound impact on the health of your patients.

Learning Objectives

- Learn how to identify the many seemingly unrelated symptoms associated with a dysfunctional adrenal response
- Learn effective in-office and laboratory assessments that will provide the information necessary to fully understand the underlying causes of adrenal dysfunction
- Learn effective treatment options and consideration to correct the underlying problems for those suffering from chronic stress

1pm-2:40pm**Clinical CE***Speaker: Mitchell Mally, DC***Carpal Tunnel Syndrome & Cumulative Trauma Disorders****Course Description**

Attendees will learn the most comprehensive discussion on Repetitive Strain Injuries featuring CTS, CTDs, and entrapment neuropathies of the wrist, hand and elbow. This fast paced didactic lecture is highlighted with clinical demonstrations and the rationale that supports the efficacy of chiropractic care for these conditions. Dr. Mally lectures world-wide and is a recognized authority on the diagnosis, treatment and rehabilitation of extremity conditions, injuries and syndromes. The FCA is excited to have Dr. Mally returning to entertain and educate the attendees and is featured at the 2015 Spring, Summer, Fall and Winter Conventions.

Learning Objectives

- Review the anatomy and biomechanics relative to conditions of the shoulder
- Discuss the effects on the cervical and thoracic spine is coupled with demonstrations
- Review and understand x-rays, 3D animations and computer graphics of the shoulder

Lower Extremity Adjusting Gems for the Everyday Practitioner

Course Description

In this lecture, esteemed sports chiropractor and two-time Olympic chiropractic provider, Dr. Jonathan Wilhelm, will be presenting his findings on the most effective Chiropractic Adjusting Techniques for the Knee, Ankle, and Foot. This course comes highly recommended for all practitioners who aspire to enhance the quality of their practice and elevate patient outcomes by effectively addressing Extremity Conditions.

The lecture will commence with a comprehensive review of Inspection and Palpation, providing participants with a solid foundation. Following this will be an engaging hands-on practice session, allowing attendees to acquire and refine adjustment techniques that can be seamlessly incorporated into their daily practice.

Learning Objectives

- Participants will have the opportunity to demonstrate and practice twelve highly effective Manipulation Techniques for the Lower extremities, equipping them with a diverse range of skills
- Multiple Chiropractic Adjusting Techniques for Each Joint will be explored, enabling practitioners to tailor their approach to suit individual patient needs
- A Detailed Description of Joint Tension and Line of Drive will be provided, offering a deeper understanding of the mechanics involved in achieving optimal results
- Emphasis will be placed on Proper Body Mechanics, highlighting the importance of maintaining proper posture and technique to ensure longevity in one's chiropractic career

- Theory, Screening, and Clinical Application will be covered, including strategies for supporting proper biomechanics of the lower extremity

Solving the Obesity Epidemic as a Chiropractor

Course Description

The Obesity Epidemic, according to the CDC, is one of the fastest growing and dangerous conditions that we are facing. As Doctors of Chiropractors, we are the wholistic and wellness providers. We need to be teaching lifestyle, but also let our patients and communities know that we can help them. In this inspiring presentation, Dr. Fab will go over the statistics and demand by consumers to find a provider that can help their obesity. He will also go over the science and solutions that as Chiropractors we must consider. Lastly, he will share how technology is helping Chiropractors be effective in this arena.

Learning Objectives

- Empower the Doctor of Chiropractic to tackle the Obesity Epidemic
- Share facts and science to support the education to our communities and existing patients
- Share effective communication tools to engage our patients. It will share technologies that are being effective in this battle

Strategies of Care for the Chiropractic Patient

Course Description

Chiropractors often feel isolated in the discussion of mainstream healthcare, believing an equal seat at the healthcare table is far fetched. This class will prove that this isolated thinking is a way of the past, and the future of healthcare depends on integration of chiropractic, and strategic care plan for your patient is now more than ever; yet it is our job to communicate this effectively. We have invited a panel of doctors to illustrate how documentation and record keeping are communication tools that allow us to interact with the allopathic community. Documented results from Gallup Poll #3 will be followed by chiropractors focusing on different areas of interactive success between chiropractors and the medical model, showcasing how the collaborative community has the greatest benefit for patients. If chiropractic is to take a prominent seat at the healthcare table, it will have to do so with research, statistics, an established outlined care of plan as described by the participants in this panel, and in a spirit of cooperation. With the climate of society and ever-changing-healthcare, the time is NOW!

Beyond Traditional: Forging Your Brand Identity through High-Tech Healing

Course Description

In a world where innovation shapes the future, the chiropractic landscape is experiencing a remarkable transformation. This dynamic course, "Beyond Traditional: Forging Your Brand Identity through High-Tech Healing," invites chiropractors to embrace the power of modern therapeutic technologies and redefine their brand's essence.

In this immersive learning experience, participants will delve into the art of crafting a brand identity that not only differentiates them from the crowd but also reshapes the perception of chiropractic care. We believe that high-tech therapies are the catalysts for reimagining the boundaries of traditional practices, and this course serves as your guide to navigating this evolution.

Learning Objectives

- Understanding the Role of High-Tech Therapies in Brand Evolution
- Crafting a Cohesive Brand Narrative Aligned with High-Tech Healing
- Implementing Ethical and Transparent Strategies for Brand Transformation

Navigating Female Health

Course Description

There is an epidemic of overprescribing of birth control, anti-depressants, HRT, bio identical hormones, thyroid medication, stimulants, and many other unnecessary medications or procedures that are no more than a dangerous piece of duct tape put over the female "check engine light".

If we don't talk to our women patients, who will? Now is the time. We are surrounded by colleagues who are leaders in women's nutrition. We must start working as a team. If you do not want to do this type of work, that's fine, but make sure you are helping them find the right person.

Women's health issues are complicated and messy. But the body wants to be well and often it takes a few small steps to get her moving in the right direction. There are no short cuts but there are REAL solutions. It is time to take back our health and all decisions surrounding it.

8am-9:40am

Risk Management

Speakers: Michael Coates, Esq. / Patrick Causey, Esq.

The Risks of PI and PIP in Florida: Spotting and Stopping Attorney, Provider, and Insurer Game Fouls Including the Claw Back Scheme of PIP Carriers

Course Description

The personal injury business involves several players – patients, attorneys, medical providers, and insurance adjusters among them. Each has its own sometimes risk fluid motivations that are financially driven and often come at the expense of medical providers. This course will help providers understand each player's self interests, and the strategies and tactics those players employ in the PI "game." Most importantly, providers will learn how to avoid the pitfalls that can legally and financially damage their medical practice and how to protect their practices.

Learning Objectives

- Identify, prevent and resolve legal and ethical violations (fouls), intentional or otherwise, committed by patients, attorneys, and insurers
- Understand and prevent the legal and avoid risk violations providers can make when dealing with PI patients and their attorneys, as well as with insurers
- Adept at complying with the NSA's consent and GFE requirements, and regulatory disclosure and documentation mandates

CBD, Hemp, and Chiropractors: Legal and Ethical Practice Implementation

Course Description

This course will introduce cannabinoid therapy basics and provide discussion of legal and ethical considerations when implementing CBD and other cannabinoids into healthcare practices. Topics to be covered include intro to the endocannabinoid system (ECS) and how CBD and other cannabinoids interact with it. Cannabinoid delivery systems will be discussed as well as evidence-based therapeutic applications/protocols, risks of use/contraindications, and potential drug interactions. Considering the recent popularity of CBD and other cannabis products, understanding the difference between cannabis, hemp, and marijuana is necessary in order to navigate federal "gray areas" and avoid potential malpractice pitfalls.

Learning Objectives

- Evaluate the endocannabinoid system (ECS) and discuss how CBD and other cannabinoids interact with it
- Assess potential risks, contraindications, and drug interactions involved with cannabinoid therapy
- Investigate the 2018 Farm Bill and its legal and ethical implications for chiropractors

10:20am-Noon

Acupuncture Risk Management

Speaker: Kristine Tohtz, DC, LAC

Identification of Pain, Addiction & Mood in TCM

Course Description

To provide the Chiropractic clinician with up to date information to identify common signs and symptoms of substance abuse. Discuss how to manage, treat, and monitor multiple types of substance abuse encountered. Attendees will learn treatment strategies utilizing acupuncture and ways to cotreat with other healthcare providers.

Learning Objectives

- Analyze mood disorders in the TCM paradigm
- Review organ pathologies that can lead to mood disorders / addiction
- Describe the difference in pain models within TCM

Saturday - 11/18/2023

10:20am-Noon**Clinical CE***Speaker: Brie Gindele, DC, CACCP*

Safe and Effective Infant Examining and Adjusting

Course Description

Gain a new perspective when caring for the pediatric patients. This course will help you gain a stronger understanding and confidence to avoid risk from the initial examination to their end of a treatment plan. We will touch on diagnosing, outcome assessments and specifics to document based on age group of your pediatric patient.

10:20am-Noon**Clinical CE***Speaker: Sabrina Atkins, DC*

The Validation of Chiropractic: Building an Evidence Based Practice

Course Description

Dr. Owens, will do an overview of how validation of chiropractic has taken place and continues to support the growth of our profession.

Learning Objectives

- Understand the trends in published evidence supporting the Doctor of Chiropractic as spine management
- Describe the phases of chiropractic intervention and the supportive literature
- Outline the process of collaboration with other healthcare professionals in your community by taking a lead role in the diagnosis and management of spine pain

1pm-2:40pm

Clinical CE

Speaker: Todd Narson, DC, DACBSP

Documentation, CPT Coding & Record Keeping for Personal Injury, Sports Injury & Rehab

Course Description

Proper documentation and proper CPT coding and are co-dependent in today's chiropractic practice. A thorough discussion of documentation of the doctor's encounter with the new patient and subsequent follow up visits including establishing medical necessity for all treatment recommended and performed along with the proper use of CPT coding as it pertains to the most common examination and treatment procedure codes in the modern chiropractic practice.

This discussion begins with end in mind by starting from the insurance reimbursement check and works backwards through a thorough dissection of the health insurance claim form, daily SOAP notes and the initial report. The entire discussion is centered on medical necessity and the doctors are shown how medical necessity is developed and where it comes into play from the initial visit to the printing of a claim form.

We continue with a discussion of various CPT codes used in the chiropractic practice. Compare and contrast therapeutic modalities with physical therapies. Examples are given throughout showing (1) how to choose the appropriate code and (2) how to document the use of that code in the patient's records.

Learning Objectives

- Understand how to establish medical necessity to support their treatment plans and to document appropriately to (a) avoid payment delays or denials
- Reduce the likelihood of compliance audits and fraud, and (3) to get reimbursed for their time and expertise

Adolescent Scoliosis

Course Description

In this course, you will learn about the differences between adolescent and adult scoliosis, as well as the prevalence of adolescent scoliosis in the general population. We will discuss the risk factors for progression of scoliosis and how to diagnose.

Furthermore, we will cover the ideal treatment in different presentations of adolescent scoliosis, so that you can gain a comprehensive understanding of how to effectively manage this condition. We will teach not just how to diagnose, but what to do once it is found. By the end of this lecture, you will have a strong grasp of the causes, symptoms, and treatments of adolescent scoliosis, and be better equipped to care for patients who suffer from this condition.

Learning Objectives

- Explain the differences between adolescent and adult scoliosis
- Explain the prevalence of adolescent scoliosis in the general population
- Explain risk factors for progression
- How to diagnose adolescent scoliosis
- Demonstrate an understanding of the ideal treatment in different adolescent scoliosis presentations

3:20pm-5pm

Patient Outcomes & Reimbursement Technology...Keeping Things Ethical

Course Description

Chiropractors deal with many challenges on a daily basis outside of actually treating the patient: business methodologies, data privacy and security, understanding emerging tech to drive improved outcomes, educating patients, and social determinants of health. This course is designed to address these issues, bringing awareness to the ethical standards that drive better results for patients and providers alike.

Learning Objectives

- Driving ethics through clinical care plan adherence
- Implementing ethical approaches to protecting your data, patients, practice through data security measures
- Understanding emerging technology – Big data, artificial intelligence, and machine learning
- Knowledge base around owning YOUR data, know your data and act on your data...ethically
- Understanding social determinants of health in the patient journey

10:20am-Noon

Risk Management

Speaker: Eric Plasker, DC

Risk Management and Chiropractic Practice: A Fresh Perspective

Course Description

Minimizing the risks associated with chiropractic practice and the health concerns that chiropractors care for are important to be aware of. There are certainly risks associated with the care, office environment, documentation, and procedures.

There are also risks of not receiving chiropractic care. In this session we will explore the common sense and more importantly, uncommon perspectives that will help you manage both your risk and your patient's risk to build trusting relationships that can last a lifetime.

Learning Objectives

- Identifying patient risks through diagnostic protocols and making appropriate recommendations to refer and or provide care
- Identify the risks associated with chiropractic conditions that are not treated and make appropriate recommendations for care
- Identify non-chiropractic risks associated with your chiropractic practice and what you can do to protect yourself appropriately
